

# SoftGloss XS

# VS

# Water Wizard

## Winner: The SoftGloss XS by Ryko

This location had two Jim Coleman Water Wizards. One Water Wizard was removed and the other one was rebuilt to new condition. Then a SoftGloss XS was installed in the bay formerly occupied by the Water Wizard. The SoftGloss has consistently generated more income per month by itself than the two Water Wizards were generating combined. Wash quality and revenues are up and cost per wash is down!

Decision by a knockout: SoftGloss XS by Ryko!

# SoftGloss XS

# VS

# Laser Wash

## Winner: The SoftGloss XS by Ryko

This location had an old Ryko Voyager II brush machine next to a PDQ Laser Wash. The customer decided to replace the Voyager II because the Laser Wash had dryers and tri-foam conditioner and the Voyager II did not. The Voyager II had been running at a two to one ratio since it was installed eight years prior, with very little service needed. The customer liked the SoftGloss with Foambrite, with its many safety features and available options, such as tri-foam and on-board dryers, so that both washes would provide comparable offerings. The SoftGloss has been holding at a three to one ratio over the Laser Wash.
